

WINDPOWER CHEAPER THAN NUCLEAR.

Electricity generation costs from wind power are now less than half those of Sizewell B. In 1991 wind power contracts were issued for 11pence /kWh, but dropped to 4.3p/kWh by 1994 - just above that of the newer 'clean' coal power stations. The costs have fallen partly because the original contracts were based on short periods of around 6 years, but are now over the more typical 15 years. The other major factor is the falling costs of producing wind turbines. If as much money/resources had been spent on research and development of renewable energy sources as had been spent on nuclear power it is likely that some of them would now be even cheaper than the gas-fired CHP - at 2p/kWh. The UK still

has no offshore wind power demonstration programme, unlike Denmark, Sweden and Holland.

Government figures show 300MW of renewable electricity production was commissioned between 1990 and 1994; an additional 627MW of renewable energy contracts were issued by the government in November 1994. In total this is roughly the equivalent capacity to that projected for Sizewell B. This is a significant achievement for renewable energy, especially considering it's recent development and government reluctance to adequately fund alternative energy sources and have production less centralised. The development of renewable energy has not been helped

by the ambivalence of some environmentalists to wind farms; at least now FoE and other groups such as the Council for Protection of Rural England have made guidelines on their siting. Some groups actively oppose wind farms, but often have a hidden agenda. The Country Guardians an anti-windmill pressure group, was set up by Joseph Lythgoe - a quarry developer who owns an 800 acre estate in Northumberland. It's vice - president is Sir Bernard Ingram, a public relations adviser to BNFL.

A recent example of the NIMBY syndrome is at Pica, Copeland, where residents have so far objected to the wind turbines because they would ruin the view. Pica is 12 miles from Sellafield.

VANUNU: " Secrets and democracy can't live together"

Susannah York recently headed an international delegation to highlight the case of Mordechai Vanunu, imprisoned since he revealed the existence of Israel's nuclear arsenal to the Sunday Times in 1986. They visited Ashkelon prison but were not allowed to see Mordechai or pass on his Peace Prize. But they held a meeting with the President of Israel and got very wide coverage in the Israeli press and TV. On December 28th Dedi Zugar, an Israeli MP visited Mordechai in prison accompanied by the Minister of Police. This was the first visit by an Israeli MP to Vanunu. Mordechai has been encouraged by recent events particularly the visit. He has started replying to some letters, has asked for a new lawyer and for a medical/humanitarian visit. Here is what he wrote to Susannah York:

Jan 1st 1995

Dear Susannah York,

I just want to thank you and to send you my greetings, and to say that I am very appreciative of what you have said about me. I want to tell you that you are the one who sees and understands my action in the same way as I believed and did. When I read what you have said it was like I was speaking myself. It is great and wonderful to have people like you who act and come to help on behalf of me and on behalf of my action. So I am writing to you to support you and to support all those who want to support me. Your action in speaking very boldly and clear and loud makes me happy and gives me strength and encouragement to keep on in this "dark age". I am in solitary confinement and even I am not speaking and writing. My silence is very noisy for a man who acted and succeeded in doing what I did. Nothing and no-one can silence my spirit, my mind. there are no boundaries or prisons to the human spirit - I am still alive. I am waiting for my release. Even you didn't see me . Don't be upset. This is their way to break me and my supporters and my comfort, but as I wrote at the beginning " they will never change what I have done - it's irreversible".

As you said it is a benchmark, a standard, but now you are the standard. You and all those who support my action against nuclear proliferation, against unlawful secrets. You are telling the world that in these matters there are no boundaries, no nations. It is an affair for all human beings, for all peoples. To be against nuclear secrets is to be for a real democratic state. Now, after the Cold War, there are no enemies for the Democratic states. The only enemies left from this Cold War are the secrets. Secrets and democracy can't live together. To keep a man in solitary confinement is a secret, is anti-democratic, inhuman. To make the world more democratic there must be less and less secrets. Where there are less secrets there you will find more human rights.

So thankyou very much to all those who stand behind me and are working for my release.

LOVE PEACE
Mordechai Vanunu.

[The text of the letter has been edited in order to improve the English.]

The Campaign to free Vanunu & for a nuclear free Middle East can be contacted at : 89 Borough High Street, London SE1 1NL. Tel/fax 0171 378 9324.

URANIUM INSTITUTE OCCUPIED!

On 27th February 15 marchers from the Walk Across Europe for a Nuclear Free World occupied the headquarters of the Uranium Institute in Knightsbridge in protest against uranium mining. The three hour occupation was just one event on the 9 month walk that takes the marchers through 10 European countries.

The British leg of the Walk went from Portsmouth to Ramsgate and took in a blockade at Aldermaston. A blight was put on the British section by the British Immigration service who made it impossible for 12 walkers to enter the country. That left 46 walkers crossing to Britain, with others joining them on the way. The atmosphere on the march was one of positive international solidarity, with walkers from different countries discovering the international connections of the nuclear industry. A demonstration was held outside the visa section of the Foreign & Commonwealth Office in protest at Britain's racist immigration policies.

The Walk ends in Moscow on October 12th.

DECOMMISSIONING CONFERENCE PICKETTED

On 14th February members of the Anti-Nuclear Network, CND & Shut Down Sizewell picketed Nuclear Electric and other firms who were holding a conference on "the commercial opportunities" of decommissioning nuclear plant at London's Royal Lancaster Hotel. Passers-by were given a leaflet putting the cost to the taxpayer of the nuclear industry at £100,000 million. Thanks to everyone who took part.

VANUNU PICKET HITS ISRAELI TOURIST BOARD

As an addition to the weekly picket for Vanunu on Saturdays outside the Israeli Embassy in Kensington High Street we decided to picket outside the Israeli Government Tourist Board. This turned out to be a very inconspicuous office in Great Marlborough Street, but there were plenty of people coming off Regent Street to see our banners, take a leaflet and sign our petition. The security called the cops, but obviously pissed them off so much, that we had the rare experience of a policeman defending our right to protest!

SIZEWELL GOES CRITICAL

On Tuesday 31st January, Lord Wakeham performed the symbolic switch-on of the Three Mile Island type reactor at Sizewell. About 50 people protested on site - several locked-on to gates and other equipment. Lord Wakeham coyly avoided us: he came in and went by helicopter, safely behind the security fence and a posse of security guards. In front of the TV cameras he announced "You can be absolutely sure that it is pretty safe".
The completion of Sizewell B

leaves the UK for the first time in 40 years (since the start of the nuclear programme) without any nuclear station under construction. At Hinkley Nuclear Electric are keeping there options open by submitting a series of planning applications to West Somerset District Council in connection with the Hinkley C plan. Planning permission was granted for the C station in September 1990, but construction had to start within seven years, and detailed plans for ancilliary works have to be submitted by

this September. Plans for a workers hostel, changes to the Wharf at Comwich, and diversions to various footpaths have already been submitted with submissions for construction site buildings, a new sea wall and landscaping likely soon. The plans for the workers hostel were delayed for a year after it was discovered that the original site would destroy a site of archaeological interest, said to be a saxon settlement.

Meanwhile opposition is growing to Nuclear Electric's plans for a twin-reactor at Sizewell C. Nuclear Electric's planning application has been refused by Suffolk County Council, obliging Michael Heseltine to call a planning inquiry. Norfolk and Suffolk County Councils, some district councils and local amenity groups have formed a consortium to oppose the £3.5 billion plan.

Source - Shut Down Sizewell Stop Hinkley Expansion.

THORP FAULTERS

A year on from the High Court decision which gave BNFL the go-ahead for THORP, the plant has yet to complete a reprocessing run. BNFL are now talking about a "phased commissioning" of the plant. Meanwhile two German contracts have been cancelled.

Prior to last years High Court decision BNFL claimed that delays were costing the company £2 million per week. This being the case, about £100 million revenue has been lost, equivalent to 20% of the profit BNFL esti-

mates will be generated from the first 10 years of reprocessing work.

Now two German nuclear utilities have withdrawn contracts to reprocess spent fuel at THORP in the 2nd phase of operation between 2004 - 2014AD.

Hamburgische-Electricitaets-Werke AG (HEW) and RWE Energie AG (RWE) contracts represent about 18% of overall business for that period. This raises doubts about the viability of THORP beyond the first 10 years. HEW's and RWE's decision was triggered by a change in German Federal Law in July 1993 which now permits direct disposal of spent fuel in Germany, a cheaper option. " Nuclear

Fuel" 16 January, reports " In the coming weeks and months more German utilities will likely join HEW and RWE in scuttling reprocessing contracts with BNFL and Cogema ".

Here Scottish Nuclear is arguing for dry storage of spent fuel at Torness, whilst Nuclear Electric plan to store spent fuel from Sizewell B on site, rather than reprocess at THORP. Two years on from the much heralded £13 billion deal between NE, SN and BNFL to reprocess Magnox and AGR fuels the contract remains unsigned because of disagreements over who should pay for unforeseeable increased costs.

If you go out on the road today...

Nuclear transport news

Photo: Mirror Syndication International

On 10 March a lorry carrying low level nuclear waste from Winfrith in Dorset to be dumped at Drigg in Cumbria, blew a tyre and left the M5 at speed, rolling down the embankment. All afternoon, the nuclear industry insisted that there was no radioactive leak and at 5pm the Transport Police declared that the incident was being treated as a normal traffic accident. However, after dark, local CND activists spotted more 'experts' with geiger counters checking the site.

The incident came a week after a flask containing highly radioactive spent fuel rods was dropped off a crane at Sizewell. Instead of being transferred to a waiting train, it landed back on the lorry which had transported it, writing it off completely. Roger Stern, who took the opportunity "to see how competent Nuclear Electric were at dealing with emergencies" was charged with trespass on British Rail property and assaulting a police officer. He may make a formal complaint about his treatment to the police.

Nuclear hijacks court ruling

West Cumbrian Gazette - 16 March 1995.

THE High Court in London has warned Greenpeace - 'Keep your hands off nuclear cargoes travelling on Cumbrian roads.'

It follows the environment group's highly-publicised protest against a spent nuclear fuel transporter at Southwaite Services on the M6.

The protest saw anti-nuclear activists chaining themselves to the vehicle.

A wide-ranging injunction preventing Greenpeace interfering with BNFL's transportation of nuclear material on road, rail or sea was granted by the High court after the environment group refused to pledge that they would not interfere with nuclear cargoes in the future.

LOAD CAT.	WAGON LETTER & NUMBER
H	7099870010

Above & below: The bills of lading from a German spent nuclear fuel flask which passed through London on 30 March. British Rail took out an injunction against Greenpeace to prevent them hindering the nuclear transport, but this didn't stop other activists from paint-bombing the train. The (German) notice below says that the flask contains 88.71 Peta Becquerels of radioactivity, ie 88,710,000,000,000,000 Bq.

'Mines' on ship

An action team from CORE - Cumbrians Opposed to a Radioactive Environment - attached dummy limpet mines to a BNFL vessel below its waterline in a stunt to demonstrate what they consider to be the "lax security" surrounding nuclear ships.

A CORE spokesman said: "In exposing lax security we have proved that a dedicated terrorist gang could scuttle with

ease all BNFL's nuclear ships - or pick any one out at random for special treatment."

The CORE action - at the Ramsden Dock in Barrow - involved the Pacific Crane vessel. Two other ships were berthed nearby, the Pacific Teal and the Pacific Pintail.

The Pacific Swan and the European Shearwater - also nuclear cargo carriers - were also in the area.

The CORE spokesman added: "Either the Pacific Crane or Pintail is likely to carry the highly controversial first shipment of high level waste to Japan later this month increasing international opposition to this dangerous cargo. W. Cumbrian Gazz - 16/2/95.

CONVOY CAPERS

AT THE END OF OCTOBER, YORKSHIRE & HUMBERSIDE CND'S INFAMOUS MOCK NUCLEAR WARHEAD CONVOY MET THE REAL THING.

The mock convoy - consisting of a 14 foot Trident missile loaded onto a Transit Truck bearing signs announcing "Nuclear Warhead In Transit", an "armed escort" (yes, Dave's Escort car with arms attached to the roof rack!) and other accompanying vehicles (more dreadful puns incorporated) - had been fully refurbished and was all ready to set off south down the A1 to join the CND rally in London, when we heard that its much more deadly relation was heading up our way.

A quick change of plan and we headed for Aberford on the A1 to the east of Leeds to lie in wait for the real thing. As it approached, we filtered into the traffic, together with film crews from Yorkshire TV and Channel Four, to join the convoy proper. They were not pleased!! Several times the MoD vehicles manoeuvred so as to try to obscure the view of the YTV cameraman who was

filming out of the top of their vehicle's sunroof. Lots of other travellers gave us the thumbs up as they realised what the convoy was carrying. At Bramham Bridge a line of press photographers snapped their cameras as we sped by.

Finally, the convoy turned into RAF Leeming for its afternoon break. We waited for it to emerge but it skulked out the back gate rather than face us and the cameras again.

On its return trip south a few days later, the convoy was again trailed by Yorkshire & Humberside CND - this time without the mock convoy, but with a pot of white paint! At Clumber Park (a regular convoy stopping off point near Worksop), intrepid Nukewatchers, Kate and Sylvia, stepped out in front of the convoy just as it began to move off, clambered onto the cab of the front warhead carrier and coated the windscreen with white gloss paint. It took at

least 45 minutes for the MoD personnel to clean the windscreen and for the convoy to be ready to set off again.

Kate and Sylvia were arrested and subsequently charged with criminal damage to the tune of £2119.85.

Y & H CND's mock convoy meets the real thing.

VOTE LABOUR AND STILL DIE HORRIBLY

Labour's policy on nuclear power still seems to be up in the air. On New Years Day Martin 'nuke' O'Neill, the party's energy spokesperson implied that Labour's nuclear power phase-out policy (which would still mean nuclear power until 2040AD) would be scrapped. On January 8th, Blair told the Sunday Times that the policy would not be changed. Yet a few days later Shadow Trade and Industry minister 'Nuclear Jack' Cunningham told BBC2 that building new nuclear power stations "cannot be ruled out".

On 12 January O'Neill wrote to the East Anglia Safe Energy Alliance concerning the commissioning of Sizewell B saying "I am not opposed to the station being loaded with fuel rods and starting to generate electricity. The Labour Party in it's 1992 election manifesto was opposed to the construction of any more nuclear power stations. That was when an incoming Labour Government would have been in a position to have reassessed Sizewell. Since this is no longer a realistic option, I do not see any useful purpose being fulfilled in the plant lying idle".

LETTERS.....LETTERS.....LETTERS.....

From Helen, People Against Wylfa B:

Thankyou for including part of our leaflet about the court case in which the nuclear power station was proved to be guilty and fined £20,000 + £14,000 cost. (see ANN no 31). I should have written earlier but I delayed because more charges (this time by the Health and Safety Executive) are being brought against Nuclear Electric in respect of the above accident. This summons is to a hearing at Caernarfon Crown Court because of the seriousness of the offences (the earlier hearing was at the local magistrates court). Apparently the case will not take place until later on this year so we'll have to wait quite a long time. In the meantime Nuclear Electric has launched a massive propaganda campaign in the local newspapers.

[The example sent to us say's "Visit Trawsfynydd & Wylfa power stations - it's fun, exciting & free" - suprisingly it doesn't mention the accident at Wylfa and the recent fine, or that Trawsfynydd will be a radioactive tomb for the next 135 years. Perhaps you could ring them on 01766-540622 or 01407-711400 and put them right on this].

The Non-Pontification Treaty

The nuclear non-proliferation treaty (NPT) is a 25 year old international agreement by 167 countries and its renewal is being discussed in New York : April 17 - May 12. Supposedly it was designed to halt the spread of nuclear weapons; the countries without them ("the have nots") agreed not to get any and the "haves" (Britain,Russia and the USA - although not France or China) agreed to move to "general and complete nuclear disarmament". The NPT has failed dismally in meeting these objectives. Many more countries now have the bomb, (assisted by the "haves" through their export of the technology of nuclear power), while the "haves" went ahead and developed a larger stock of more deadly weapons - 2,000 tests and 127,000 warheads produced.

The International Atomic Energy Agency (IAEA) is supposed to police the treaty but was set up (35 years ago) to promote the nuclear industry. It failed to detect development work on nuclear bombs in Korea and Iraq and raised no protest over the French sale of plutonium to Japan - only 4% of the worlds plutonium is under scrutiny.

In reality the Treaty was a public relations exercise with no deadlines or limits - allowing "business as usual".

Whatever is decided about the future of the NPT, it is only the continued opposition to nuclear power and nuclear weapons that will succeed in making a safer world.

JANUARY

4. Dungeness B and Heysham A shut-down due to cracked pipework = £1m a day loss to Nuclear Electric.
6. US and Israeli officials claim Iran is only 5 years away from atomic bomb.
8. India's Kakrapar 2 reactor went critical. Safety review called for after fire at Narora 1 plant last March.
11. US backed down on it's demand that Pakistan cuts nuke weapon prog.
12. US nuke site at Hanford released 10-15% of iodine131 released by Chernobyl.
14. 50kg of uranium was found on a tip in Northamptonshire. The area was used as a playground by children.
16. Nuclear Electric is to import 15% of it's uranium from Russia in a deal worth £80m. The uranium may come from Tomsk 7 in Sibera. The plant was closed in 1993 after an explosion led to widespread radioactive contamination.
17. A man discovered a drum of uranium in his garden in Kettering. This makes 6 found in Northamptonshire.
17. Japanese authorities claimed that the 20 nuclear plants within 200 km of the epicentre of the Kobe earthquake were not affected.
19. Douglas Hurd claimed Iran posed the greatest danger of nuclear proliferation in the post cold war era. US reckon Iran could have weapons in 7 -15 years.
21. A five year run down of nuclear bomb factories with the loss of 850 jobs will follow completion of the Trident submarine program. AWE Llanishen near Cardiff is to close 1997.
21. US economic sanctions against North Korea were partially lifted following last Octobers deal, North Korea would replace it's nuclear reactors with 2 light water reactors. US firms will be able to bid for the £4 billion deal.
21. Lindis Percy was sent to prison for 1 week for entering US airbase Lakenheath, in breach of a high court injunction.
25. 4 protestors cleared of charges of intending to cause criminal damage at a British Aerospace airfield. They said

they would continue to campaign against the sale of Hawk warplanes to Indonesia .

26. The Government confirms it is to flogg off the A.E.A.
26. A Norwegian rocket caused alarm when a Moscow News Agency wrongly reported that it had been shot down by Russian air defences.
30. The MOD has admitted that it overspent by £162m on hiring 24 firms of management consultants for Trident facilities at Faslane and Coulport.
31. Technicians at Chernobyl accidently shut down one of the two working reactors. One explanation for the incident was that they had detected a leak in the cooling system another that they had triggered an automatic security system.

FEBRUARY

1. Automatic safety systems shut-down a St. Petersburg nuclear reactor after operators mistakenly switched off a generator.
1. Turkey signs a deal with S. Korea for prelim. work on Akkuyu Nuclear power plant.
1. Scottish Nuclear signed a £1.9m deal to up grade Russian Nuclear plant at Smolensk.
2. The Mescalero Apache tribe voted down a proposal to dump 1000's of tons of spent nuclear fuel rods on their reservation in New Mexico.
15. A London seminar is told that the recent seizures of illicit plutonium and uranium were just the tip of the iceberg.
17. The Nuclear Installations Inspectorate has launched an inquiry into a blowout which contaminated seven workers with plutonium dust at Dounreay.
18. Amersham International fined £5,500 after a worker recieved a years permitted radiation dose in 2 seconds.
23. Pacific nations are protesting against a shipment of highly radioactive waste traveling from France to Japan.
24. French commandoes guarded the British ship as it left Cherbourg with it's cargo of nukiller waste. A Greenpeace vessel tried to stop the sailing but was rammed by a French Navy tug.

24. New studies suggest that the Chernobyl explosion released a 100 million curies of dangerous radio-nuclides. WHO says that 4.9 million people in Ukraine, Belarus and Russia were affected.

28. Rolls Royce Nuclear Engineering was fined £15,000 after asbestos from their Wolverhampton factory caused 'widespread contamination'.

MARCH

1. BNFL made a deal with Scottish Nuclear to take all the fuel from it's reactors.
2. 17 Greenpeace activists arrested nr Carlisle after chaining themselves to a lorry carrying nuclear materials. The drivers had gone to tea!
5. The Pacific Pintail, the British ship carrying 14 tons of reprocessed waste is banned from Argentinian and Chilean waters.
10. Two lanes of M5 nr Bristol were closed when a lorry carrying radioactive waste crashed and overturned in a ditch. The waste was on it's way to BNFL's dump in Drigg, Cumbria from Winfith, Dorset.
18. The MD of Chernobyl told a Greenpeace activist that of the plants original workforce of 5,000, 4,500 had left- most were dead/dying. The 500 remaining were fine because their 'positive outlook' had protected them
23. The Russians plan to build concrete sarcophagus around sunk nuclear sub. - Komsomolets.
24. Tories plan to legislate to pave the way for nuclear power privatisation. They are looking at proposals to break up Nuclear Electric, create two rivals to strengthen Scottish Nuclear. The old Magnox reactors will stay in the public sector.
24. Dr. Chris Busby of the Green Party's low level radiation campaign has been allowed access to the Welsh Cancer Registry's stats. He has found a correlation between Wale's high cancer rates and the fallout which fell in the rain in the 50's & 60's after atmospheric bomb tests.
26. A secret report obtained by the Observer reveals that a 2nd explosion at Chernobyl could happen at any time. The pillars supporting the damaged reactor are in danger of bursting.

DIARY

MAY

4: British Aerospace AGM - protest against the Hawks deal with Indonesia. Campaign Against the Arms Trade 0171-2810297.

4: Oxford Anarchist Bookfair, East Oxford Community Centre, Princes St.

11-14: Womens's Beltane Walk- Uffington White Horse, 12 noon to Aldermaston and Burghfield. Greenham 0374-136728 (8-9pm).

14: MANA concert, Oxford 0181-4551030.

15: International Climate Action Day- anti roads protest 01635-521770.

Fri 19-Sat20: Sponsored bike ride from London to Sizewell in aid of the Anti-Nuclear Network and Shut Down Sizewell. Arrives Sizewell Sat, 6pm.

20: MANA concert, Salisbury 0181-4551030.

20: Levellers Day at Burford, Oxon, 01865-735 360.

21: West Midlands CND Spring Walk, Wooten Wawan Nr Stratford. 0121-643 4617.

22: Blockade at Menwith Hill. Women only.

27: Fylingdales Peace Walk, 01723-870030.

29: Demo at Campsfield to demand release of all immigration detainees, 0865-724452.

JUNE

1: 10th anniversary of Battle of the Beanfield. Action somewhere in Wiltshire. Stonehenge Campaign, c/o 99 Torriano Avenue, London NW5 2RX.

3: London - Stonehenge walk begins.

10: National nukewatch action - South 0171-281 0297.

10: Stop the Hawks day of action - CAAT 0171-281 0297.

10 - 18: Bike week - London Cycling Campaign.
